Art Unit: 2124

DETAILED ACTION

1. Claims 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 2, the cooperative relationship between the steps of "implementing modulo addressing..." and "enabling the processor..." is unclear. The claim should recite the "register", line 4, in the first register bank to make the relationship clear.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 16 and 19 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Levison et al (6,366,938).

Levison et al discloses in figure 3 the invention as claimed, including storing a first data set (A) and second data set (B) in a first and second register bank, indexing each said data set (106) by the relative sample delay of A and B, and automatically updating the contents of the

Art Unit: 2124

register banks each sample period to write a new data sample (A or B) over the most delayed sample stored in the registers banks (see col. 5, lines 53-55).

4. Claims 17,18,20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1-11 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (571) 272-3719. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
